

In response to Council Member Larry Agran's remarks on his memo requesting a City Council Study Session regarding the continuing operations of the All American Asphalt plant, Mayor Khan retorts, "I'm going to stress that the people on this council are not the ones that allowed the building of those homes next to that asphalt plant, and we know exactly who did, and I think it's very important for the public to know as well... but this council minus one person is not the one that approved the homes there in that area..."

Council Member Agran responds, "You have proceeded to debate and discuss this issue when I simply made announcements. Now if you want to debate and discuss it and involve the public, then for heaven's sake, put the matter on the agenda at a special study session, and we can debate and discuss who did what, when, who's responsible for what and how we move forward."
